My Personal Projects Portfolio

EXPERIENCE

Ernst & Young LLP (EY)

Senior Technology Consultant – GenAI Business Analyst / Tech Lead

Aug 2025 – Present | Philadelphia, PA

- Lead enterprise GenAI and Agentic AI initiatives from discovery through architecture, prototyping, governance, and production delivery.
- Lead AI discovery across 6 business units, translating needs across Finance, Operations, IT, and Cloud into 18+ prioritized use cases and executable roadmaps.
- Architect and prototype agentic solutions using Python, FastAPI, React, GCP, Gemini, and Google ADK while directing API, data, and deployment design.

Senior Technology Consultant – AI & Intelligent Automation

Aug 2022 – Aug 2025 | Philadelphia, PA

- Helped scale a statewide intelligent automation program to 150+ deployments, saving 110,000+ hours and generating $14M in value, including $6.9M in annual savings.
- Designed NLP virtual agent and Intelligent Document Processing solutions using Azure AI, saving 3,500+ hours of manual work annually.
- Led cross-functional delivery teams and trained 150+ practitioners while providing hands-on architecture across UiPath, Azure AI, AWS, C#, Python, APIs, and cloud integrations.

American Water

Software Engineer / Intelligent Automation Engineer

Jan 2019 – Aug 2022 | Camden, NJ

- Led development of an enterprise notification application supporting communications to approximately 14 million customers using Java Spring Boot, PostgreSQL, and AWS.
- Established an Intelligent Automation Center of Excellence, defining architecture, development standards, governance, and reusable UiPath solutions.
- Built enterprise water-quality applications supporting 6,000 monthly bacteria samples and automating workflows that saved 4–8 hours per user each week.

Rowan University

Machine Learning Researcher

Sep 2018 – May 2019 | Glassboro, NJ

- Applied feature selection, neural networks, and ensemble learning to cognitive-screening data, achieving approximately 70–80%+ diagnostic accuracy.

Ellenby Technologies

Hardware & Firmware Engineering Intern

May 2018 – Aug 2018 | Woodbury Heights, NJ

- Designed an optical-scanning PCB and C++ firmware, improving coin-recognition precision by approximately 200% while reducing production cost.

EDUCATION

M.S. in Business Analytics

Temple University

2020 – 2023

GPA: 4.0

B.S. in Electrical & Computer Engineering

Rowan University

2015 – 2019

GPA: 3.98, Summa Cum Laude
First Place, IEEE Robotics Competition
Tau Beta Pi Engineering Honor Society

CORE EXPERTISE

Agentic AI; Generative AI; LLMs
AI Solution Architecture
AI Governance; AI Product Delivery
Intelligent Automation
Technical Leadership; Machine Learning

TECHNOLOGIES

AI / GenAI

Google ADK; Gemini; LangChain
Azure AI; UiPath

Software / Cloud

Python; FastAPI; Java; Spring Boot
React; JavaScript; C#
AWS; GCP; Azure; SQL

Engineering Foundations

C/C++; Embedded Systems
PCB Design; MATLAB
Microcontrollers; FPGA

CERTIFICATIONS

Snowflake SnowPro Core 2026

AWS Solutions Architect – Associate 2024

UiPath Solution Architect Professional 2025

AWS Cloud Practitioner 2024
